

ECONOMISERTM

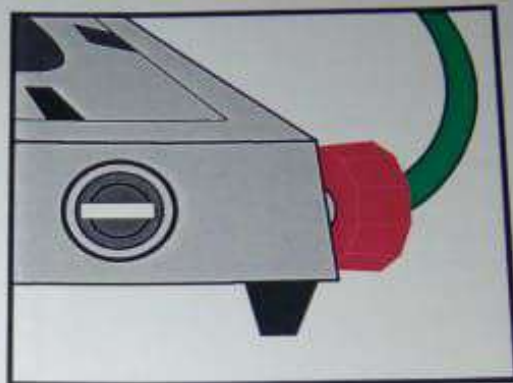

LPG/CNG GAS SAVER

Save Gas Upto 18 To 33% per Cylinder

JUST INSTAL IN YOUR GAS STOVE AND SAVE

**GAS
SAVER**

HOW IT WORK

Economiser uses high resonance magnetic frequency. When this is installed on a fuel line, the magnetic generated by its powerful magnetic field will fracture the hydrocarbon chains in the passing fuel causing the cluster of molecular to break apart thus allowing the individual moecules to get more burning or combustion of fuel and thr generation of considerably less air pollutants. In exhaust emission test shows high percentage of reduction in hydro carbons and harmful gas deposits.

GAS SAVER INSTALLATION MANUAL

- For house gas stoves the gas saver to be fixed over gas pipe nearest to the stove.
- For LPG/CNG Driven Vehicles to be fitted on the gas line just before the carburetor.

ADVANTAGES OF ECONOMISER GAS SAVER

- Saves UPTO 18 to 33% of LPG/CNG.
- Increase mileages.
- Enables complete utilization of gas form cylinders.
- Can be used in all gas driven vehicals / gas cylinders.
- Maintenance free operation.

INSTRUCTION ABOUT GAS SAVER

- Keep the gas saver away from Electric / Electronic devices.
- To be installed 10 cm / 4 inch away from electronic sensors if there.
